WOMAN'S STOMACH

It Causes Much Misery if not Kept in Condition.

Many women who would not tolerate anything but a scrupulously clean kitchen continue to get ill and suffer from an unclean stomach, where food ferments, turns sour and becomes putrid.

It is just as easy for a woman to keep her stomach clean, as to keep her kitchen clean; in fact it is much easier, and does not require hours of toil.

One or two Mi-o-na stomach tablets after each meal will in a short time thoroughly clean and renovate the most distressed stomach. They will do more; they will put strength and energy into the walls of the stomach, and cause the juices of digestion to flow freely, so that all food will promptly digest.

Women: Keep your stomach clean and free from fermenting food, and you will find that other ailments such as nausea, biliousness, sick headache, nervousness, sleeplessness, constipation and palpitation of the heart will disappear.

Kelly & Pollard and druggists everywhere sell Mi-o-na stomach tablets for only 50 cents a large box. They are guaranteed to cure indigestion or any stomach trouble, or money back. They stop belching of gas and after dinner distress in five minutes. Give them a fair trial they won't disappoint you. One woman writes:

"I had been bothered for eight years with gas, belching and bloating of the stomach. Mi-o-na cured me."

STATE GRANTS TIME FOR LAND PAYMENTS

Efforts of Senator Hudspeth in Behalf of Settlers Successful.

Through the efforts of state senator Claude B. Hudspeth, of El Paso, the settlers on the public school lands of west Texas will not be required to pay the annual 3 percent interest on the school land holdings until July 1, 1911. These payments on public school land holdings will be due in November, but owing to the drought in the western part of the state the 3 percent payment would have been a hardship on the settlers of the trans-Pecos country and would have forced many of them to have abandoned their claims.

Recognizing this fact, senator Hudspeth laid the matter before governor Campbell and asked for an act of the legislature extending the time of payment on this land. To this the governor demurred, senator Hudspeth says, because he did not wish to do western Texas country the injustice of advertising it as a droughty country when the drought through which it is passing has been an unprecedented one. Instead governor Campbell suggested that it be placed before tax commissioner J. T. Robinson, who issued an order in August that the 3 percent payment would not be required until July 1, 1911, and that no land would be forfeited to the state for non-payment during that time. This permits the settlers to use the money that would have been paid in interest to improve their ranches and get the crops in, which are expected to more than reimburse them for the losses they have sustained because of the drought.

PANHANDLE TOWNS MAKING PROTEST

(Continued from Page One.)

a water rate. He did not say that unless the water rate was granted people would likely move from parts in the Panhandle because of a shortage of the water supply, resulting from the drought, which has been general over Texas and many other parts of the United States this year.

Protest From Dalhart.

Dalhart, Tex., Sept. 27.—Commissioner of agriculture Cone, chief clerk Sam M. Dixon, and director of insti-

tutes J. W. Nell, of Austin, after a 10 days' auto trip over all the plains country, reached Dalhart last night, and are authority for the statement that there is 40 foot strata of water underlying all the Panhandle country and enough artesian water near Dalhart and nearby territory, if controlled, to irrigate the state of Texas. The Rock Island and Denver roads are not hauling water to the Panhandle country.

Childrens Has Water.

Childrens, Tex., Sept. 27.—The inquiry at the offices of the Fort Worth & Denver railway here failed today to confirm the report from Austin yesterday that the railroads are applying for

permission to carry water at reduced rates in parts of northwest Texas. Cities and towns of this section are well supplied with water.
